

# BEFORE USING JetBed

- 1** Fully charge the pump before using.  
*(Overnight if possible)*
- 2** Watch the included DVD for full setup instructions.
- 3** Do not use the pump while plugged into the 110 volt recharger. The recharger is only for charging the battery. In foreign countries, be sure to only use 110 volt. 220 volt will ruin the pump.
- 4** It is not necessary to turn and berth your plane seats.
- 5** During normal use, do not remove bed from travel case.
- 6** Do not misplace the red cap and clear air-tight plug.
- 7** Only turn the knob on the comfort valve. Do not turn the hex nut. Doing so will damage the JetBed and require factory repair.
